MANTIS

Very practical textile stand in Smart Display system. Thanks to the use of light-weight and easy to install aluminium structure you will put a stand at any place. The graphics are printed on the fabric using sublimation method, your design will have bright colours and you may wash it when it gets dirty.

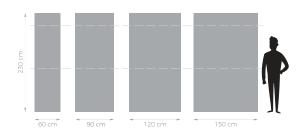

The fabric is stretched onto an aluminium frame which guarantees an aesthetic look.

Advantages of Mantis Smart Display:

- textile stretched onto the structure is finished with a zip
- one-sided or double-sided graphics
- installation requires no tools
- metal pedestal with handy bracket
- structure is made of 32 mm diameter aluminium pipes

You will get in the kit: complete Mantis Smart Display system with a transport bag

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|--------|--------|-------------------------------------------|-----------------------------------|
| Mantis | MAN60 | 60 x 230 | 4,1 kg |
| Mantis | MAN90 | 90 x 230 | 4,7 kg |
| Mantis | MAN120 | 120 x 230 | 5,3 kg |
| Mantis | MAN150 | 150 x 230 | 5,9 kg |

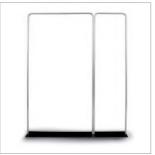

MANTIS PLATE

Mantis Plate is a continuation of our bestseller: Mantis Smart Display.

An aluminium structure and easy assembly are its characteristic features.

In the case of Mantis Plate the legs were replaced with a metal plate.

The use of such base strengthens the stability of the stand.

Advantages of Mantis Plate:

- metal plate which strengthens the base of the stand
- textile stretched onto the structure is finished with a zip
- one-sided or double-sided graphics
- installation requires no tools
- metal pedestal with handy bracket
- structure is made of 32 mm diameter aluminium pipes

You will get in the kit: complete Manta Plate Smart Display system with a transport bag

| | Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|---|--------------|----------|-------------------------------------------|-----------------------------------|
| | Mantis Plate | MAN60-P | 60 x 230 | 5,1 kg |
| | Mantis Plate | MAN90-P | 90 x 230 | 6,8 kg |
| - | Mantis Plate | MAN120-P | 120 x 230 | 9,5 kg |
| | Mantis Plate | MAN150-P | 150 x 230 | 11,6 kg |

ELEPHANTO

The great advantage is its large surface for presenting the graphics. It is printed on the fabric using sublimation method thanks to which your design will always have bright colours and you may wash it when it gets dirty.

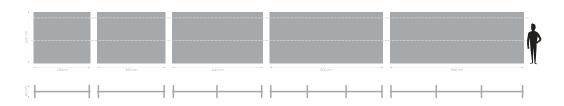

The textile stretched onto an aluminium frame guarantees an aesthetic look.

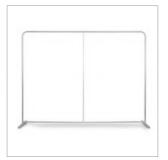

Advantages of Elephanto Smart Display:

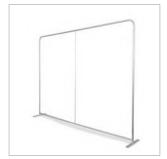

- very big surface of graphics overprint
- textile stretched onto the structure is finished with a zip attached from the bottom
- one-sided or double-sided graphics
- installation requires no tools
- wall is folded easily thanks to numbered elements
- two metal feet

You will get in the kit: complete Elephanto Smart Display system with a transport bag

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|-----------|-------|-------------------------------------------|--------------------------------|
| Elephanto | ELE25 | 250 x 225 | 9,2 kg |
| Elephanto | ELE30 | 300 x 225 | 10,9 kg |
| Elephanto | ELE40 | 400 x 225 | 14,2 kg |
| Elephanto | ELE50 | 500 x 225 | 18,4 kg |
| Elephanto | ELE60 | 590 x 225 | 21,6 kg |

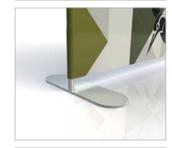

ELEPHANTO HEAVY

Elephanto Heavy is a continuation of our popular Elephanto Smart Display wall.

An aluminium structure and easy assembly are its characteristic features. In the case of Elephanto Heavy you will have extended opportunity to exhibit your advertisement. Graphics printed on fabric by means of sublimation method thanks to which your design will have distinct colours and you may wash it when it gets dirty. Stretching on a solid aluminium frame provides an aesthetic look.

Advantages of Elephanto Heavy Smart Display:

- exceptionally very big surface of graphics overprint
- textile stretched onto the structure is finished with a zip attached from the bottom
- one-sided or double-sided graphics
- installation requires no tools
- easy installation thanks to numbered elements
- 3 feet in the kit (applies to ELE40-H, ELE50-H and ELE60-H)

You will get in the kit: complete Elephanto Heavy Smart Display system with a transport bag.

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|-----------------|---------|-------------------------------------------|--------------------------------|
| Elephanto Heavy | ELE24-H | 235 x 238 | 12,3 kg |
| Elephanto Heavy | ELE30-H | 295 x 238 | 13,7 kg |
| Elephanto Heavy | ELE40-H | 395 x 238 | 17,8 kg |
| Elephanto Heavy | ELE50-H | 495 x 238 | 18,8 kg |
| Elephanto Heavy | ELE60-H | 595 x 238 | 20,3 kg |

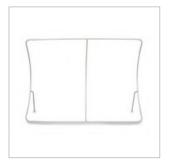

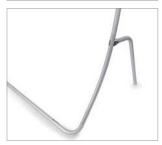

NEOTRAGO

Arc-shaped, vertical textile wall in Smooth Display system.

The graphics are printed on the fabric by means of sublimation method, thanks to which your design will have bright colours and you may wash it when it gets dirty.

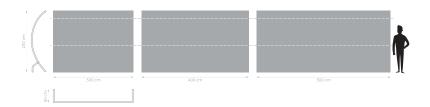

The textile stretched onto an aluminium frame guarantees an aesthetic look.

Advantages of Neotrago Smart Display:

- textile stretched onto the structure is finished with a zip attached from the bottom
- one-sided or double-sided graphics.
- installation requires no tools
- easy installation thanks to numbered elements
- stabilizing legs included
- structure is made of 30 and 32 mm diameter aluminium pipes

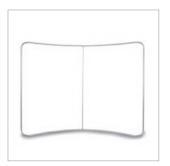

You will get in the kit: complete Neotrago Smart Display system with a transport bag

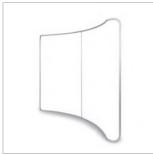

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|----------|-------|-------------------------------------------|-----------------------------------|
| Neotrago | NEO30 | 300 x 230 | 12,9 kg |
| Neotrago | NEO40 | 400 x 230 | 16,2 kg |
| Neotrago | NEO50 | 500 x 230 | 18,4 kg |

CAMELUS S

Arc-shaped, vertical textile wall in Smart Display system. Graphics are printed on the fabric by means of sublimation method thanks to which your design will always have bright colours and you may wash it when it gets dirty.

Thanks to arc-shaped sides, part of the graphics is visible also from the side. The rack of the wall is profiled in such a way that it does not need additional stabilizing legs.

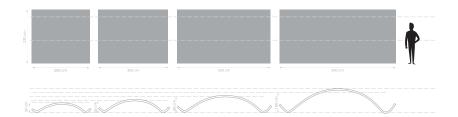

Graphics stretched on a solid aluminium frame provides an aesthetic look, which combined with simplicity of installation distinguishes the Smart Display system.

Advantages of Camelus S Smart Display:

- textile stretched onto the structure is finished with a zip attached from the bottom
- one-sided or double-sided graphics
- installation requires no tools
- easy installation thanks to numbered elements
- rack structure does not require any additional legs

You will get in the kit: complete Camelus S Smart Display system with a transport bag

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|-----------|---------|-------------------------------------------|--------------------------------|
| Camelus S | CAM25-S | 250 x 230 | 8,2 kg |
| Camelus S | CAM30-S | 300 x 230 | 9,9 kg |
| Camelus S | CAM40-S | 400 x 230 | 13,2 kg |
| Camelus S | CAM50-S | 500 x 230 | 15,4 kg |

IGUANA

Eye-catching textile wall in Smart Display system in a serpentine shape. Graphics are printed on the fabric by means of sublimation method, thanks to which your

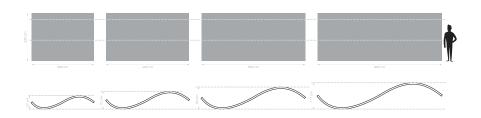

design will have bright colours and you may wash it when it gets dirty. Stretching on a solid aluminium frame provides an aesthetic look.

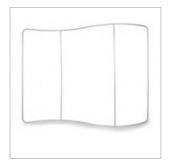

Advantages of Iguana Smart Display:

- fabric stretched on the structure is finished with a zip attached from the bottom
- one-sided or double-sided graphics
- no tools required during installation
- easy installation thanks to numbered elements.
- two metal feet
- structure is made of 30 and 32 mm diameter aluminium pipes

You will get in the kit: complete Iguana Smart Display system with a transport bag.

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|--------|-------|-------------------------------------------|--------------------------------|
| Iguana | IGU30 | 300 x 230 | 10,9 kg |
| Iguana | IGU40 | 400 x 230 | 14,2 kg |
| Iguana | IGU50 | 500 x 230 | 16,4 kg |
| Iguana | IGU60 | 600 x 230 | 19,6 kg |

DORADO

Dorado walls are increasingly used for large format banner graphics. They have a structure made of telescopic masts. They provide possibility of adjusting the height and width of walls to individual needs and space provided.

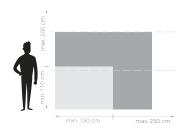

Graphics are printed from one side on a textile material.

Advantages of Dorado:

- telescopic structure allows adjusting the height and the width
- installation and disassembly
- stable structure
- graphics are mounted thanks to tunnels
- two metal feet

You will get in the kit: complete Dorado system with a transport bag

| Model | Index | Fabric dimension (width) x (height) cm | Weight structure with graphics |
|--------|-------|-------------------------------------------|-----------------------------------|
| Dorado | DOR | 150 x 200 | 7,8 kg |
| Dorado | DOR | 200 x 200 | 8,1 kg |
| Dorado | DOR | 250 x 200 | 8,5 kg |

TORO VELCRO STRAIGHT

Toro wall is designed for textile graphics which is mounted to the structure by means of Velcro.

Pop-up wall is an ideal way for creating in a short time a background, large format advertisement or stand. It will work perfectly well at conferences, business meetings, and in the case of any other types of events.

Advantages of Toro Velcro Straight wall:

- Pop-Up type of system is locked by means of clips
- light-weight structure
- fast installation
- textile graphics joined by Velcro
- foldable system

You will get in the kit: complete Toro Velcro system with a transport bag

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|---------------|----------|-----------------------------------------------------|-----------------------------------|
| Toro Velcro P | TOR3X3-P | 226 x 226 x 30 | 16,4 kg |
| Toro Velcro P | TOR3X4-P | 301 x 226 x 30 | 20,8 kg |

TORO VELCRO CURVED

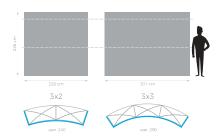

Toro Velcro Curved is a continuation of Toro Velcro, on which the textile graphics is mounted to the structure by a Velcro. Pop-up wall is an ideal way for creating in a short time a background, large format advertisement or stand.

Advantages of Toro Velcro Curved wall:

- eye-catching presentation
- light-weight structure
- Pop-up system is locked by means of clips
- textile graphics joined by Velcro
- foldable system

You will get in the kit: complete Toro Velcro system with a transport bag

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|---------------|----------|-----------------------------------------------------|-----------------------------------|
| Toro Velcro L | TOR3X3-L | 226 x 226 x 30 | 16,4 kg |
| Toro Velcro L | TOR3X4-L | 301 x 226 x 30 | 20,8 kg |

AGIES SEG STRAIGHT

System of textile Pop-Up walls, in which the graphics is finished with silicone gaskets inserted into slots in the frame.

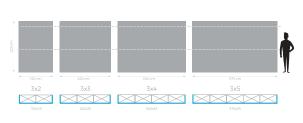

Structure is light-weight but strong, and the fabric stretched brilliantly presents the graphics. It will work perfectly well at conferences, business meetings, and in the case of any other types of events.

Advantages of Agies Seg Straight:

- Pop-up system is locked by means of clips.
- textile graphics is mounted by means of silicone tape
- light-weight structure
- excellent print quality
- one-sided graphics

You will get the Agies Seg Straight kit together with a transport bag on castors.

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|-------------|----------|-----------------------------------------------------|-----------------------------------|
| Agies SEG P | AGI3X2-P | 150 x 225 x 35 | 11,4 kg |
| Agies SEG P | AGI3X3-P | 225 x 225 x 35 | 14,9 kg |
| Agies SEG P | AGI3X4-P | 300 x 225 x 35 | 20,3 kg |
| Agies SEG P | AGI3X5-P | 375 x 225 x 35 | 27,8 kg |
| Agies SEG P | AGI4X2-P | 150 x 300 x 35 | 22,8 kg |
| Agies SEG P | AGI4X3-P | 225 x 300 x 35 | 27,5 kg |
| Agies SEG P | AGI4X4-P | 300 x 300 x 35 | 31,1 kg |

AGIES SEG STRAIGHT TWIN

System of textile Pop-Up walls, in which the graphics is finished with silicone gaskets inserted into slots in the frame.

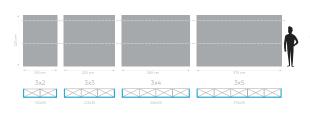

Structure is light-weight but strong, and the fabric stretched brilliantly presents the graphics. It will work perfectly well at conferences, business meetings, and in the case of any other types of events.

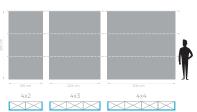

Advantages of Agies Seg Straight Twin:

- pop-up system is locked by means of clips
- textile graphics is mounted by means of silicone lining
- light-weight structure
- excellent print quality
- possibility of double-sided graphics presentation

You will get the Agies Seg Straight Twin kit together with a transport bag on castors.

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|------------------|-----------|-----------------------------------------------------|-----------------------------------|
| Agies SEG P Twin | AGI3X2-PT | 150 x 225 x 35 | 12,3 kg |
| Agies SEG P Twin | AGI3X3-PT | 225 x 225 x 35 | 16,3 kg |
| Agies SEG P Twin | AGI3X4-PT | 300 x 225 x 35 | 22,2 kg |
| Agies SEG P Twin | AGI3X5-PT | 375 x 225 x 35 | 30,2 kg |
| Agies SEG P Twin | AGI4X2-PT | 150 x 300 x 35 | 24,1 kg |
| Agies SEG P Twin | AGI4X3-PT | 225 x 300 x 35 | 29,4 kg |
| Agies SEG P Twin | AGI4X4-PT | 300 x 300 x 35 | 33,6 kg |

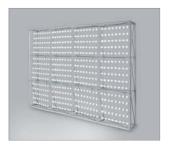

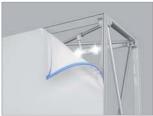

AGIES SEG STRAIGHT LED

Textile wall in the pop-up system that attracts attention. Your advertisement will get spectacular effect thanks to backlight with a specially designed LED structure. High quality textile graphics may be double-sided. The wall has mounting battens from two sides.

Advantages of Agies Seg Straight LED:

- LED backlight to exhibit the graphics in an attractive way
- Pop-Up type of system is locked by means of clips
- textile graphics is mounted by means of silicone lining
- · light-weight structure
- excellent print quality

You will get the Agies Seg Straight LED kit together with a transport bag on castors

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|-----------------|--------------|-----------------------------------------------------|--------------------------------|
| Agies SEG P LED | AGI3X2-P-LED | 150 x 225 x 35 | 15,5 kg |
| Agies SEG P LED | AGI3X3-P-LED | 225 x 225 x 35 | 20,5 kg |
| Agies SEG P LED | AGI3X4-P-LED | 300 x 225 x 35 | 28,5 kg |
| Agies SEG P LED | AGI3X5-P-LED | 375 x 225 x 35 | 37,5 kg |
| Agies SEG P LED | AGI4X2-P-LED | 150 x 300 x 35 | 28,3 kg |
| Agies SEG P LED | AGI4X3-P-LED | 225 x 300 x 35 | 35,7 kg |
| Agies SEG P LED | AGI4X4-P-LED | 300 x 300 x 35 | 42 kg |

AGIES SEG CURVED

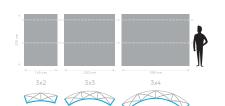

Arc-shaped version of Agies SEG wall which presents the graphics in an attractive way. Light-weight and robust structure. Easy to install and dismantle.

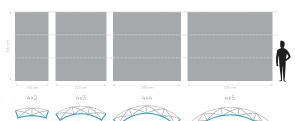

Advantages of Agies Seg Curved:

- attractive graphics presentation
- light-weight structure
- excellent print quality
- Pop-Up type of system is locked by means of clips
- textile graphics is mounted by means of silicone tape

You will get the Agies Seg Curved kit together with a transport bad on castors.

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|-------------|----------|-----------------------------------------------------|-----------------------------------|
| Agies SEG L | AGI3X2-L | 150 x 225 x 35 | 11,4 kg |
| Agies SEG L | AGI3X3-L | 225 x 225 x 35 | 14,9 kg |
| Agies SEG L | AGI3X4-L | 300 x 225 x 35 | 20,3 kg |
| Agies SEG L | AGI4X2-L | 150 x 300 x 35 | 22,8 kg |
| Agies SEG L | AGI4X3-L | 225 x 300 x 35 | 27,5 kg |
| Agies SEG L | AGI4X4-L | 300 x 300 x 35 | 31,1 kg |
| Agies SEG L | AGI4X5-L | 375 x 300 x 35 | 35,7 kg |

AGIES SEG CURVED TWIN

System of textile Pop-Up walls in which the graphics is intended for double-sided presentation.

Structure is light-weight but strong, and the textile stretched brilliantly presents the graphics. It will work perfectly well at conferences, business meetings, and in the case of any other types of events

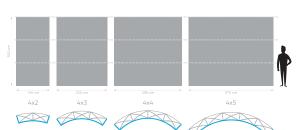

Advantages of Agies Seg Curved a Twin:

- attractive graphics presentation
- pop-up type of system
- light-weight structure
- double-sided graphics overprint
- stable structure
- fast installation

You will get the Agies Seg Curved kit together with a transport bad on castors.

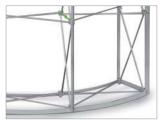

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|------------------|-----------|-----------------------------------------------------|-----------------------------------|
| Agies SEG L Twin | AGI3X2-LT | 150 x 225 x 35 | 12,3 kg |
| Agies SEG L Twin | AGI3X3-LT | 225 x 225 x 35 | 16,3 kg |
| Agies SEG L Twin | AGI3X4-LT | 300 x 225 x 35 | 22,2 kg |
| Agies SEG L Twin | AGI4X2-LT | 150 x 300 x 35 | 24,1 kg |
| Agies SEG L Twin | AGI4X3-LT | 225 x 300 x 35 | 29,4 kg |
| Agies SEG L Twin | AGI4X4-LT | 300 x 300 x 35 | 33,6 kg |
| Agies SEG L Twin | AGI4X5-LT | 375 x 300 x 35 | 38,9 kg |

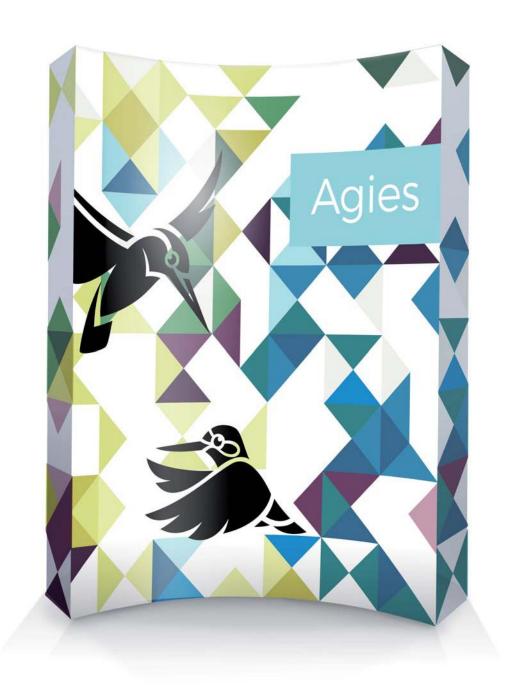

AGIES SEG CURVED LED

This is a back-lit version of arc-shaped wall which provides a spectacular effect:

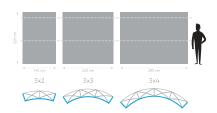

Light-weight structure, easy in installation. Stretched fabric presents the graphics in a perfect way, which thanks to back-light is brilliantly exhibited.

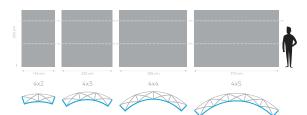

Advantages:

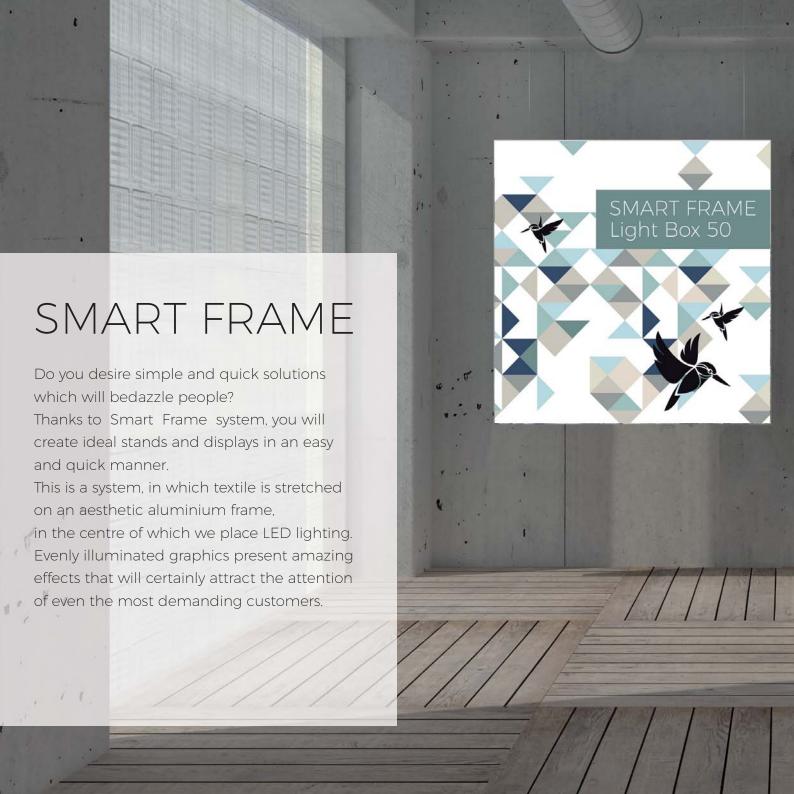

- LED back-light
- attractive graphics presentation
- light-weight structure
- excellent print quality
- pop-up system is locked by means of clips.
- textile graphics is mounted by means of silicone lining

You will get the Agies Seg Curved kit together with a transport bag on castors.

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|-----------------|--------------|-----------------------------------------------------|--------------------------------|
| Agies SEG L LED | AGI3X2-L-LED | 150 x 225 x 35 | 15,5 kg |
| Agies SEG L LED | AGI3X3-L-LED | 225 x 225 x 35 | 20,5 kg |
| Agies SEG L LED | AGI3X4-L-LED | 300 x 225 x 35 | 28,5 kg |
| Agies SEG L LED | AGI4X2-L-LED | 150 x 300 x 35 | 28,3 kg |
| Agies SEG L LED | AGI4X3-L-LED | 225 x 300 x 35 | 35,7 kg |
| Agies SEG L LED | AGI4X4-L-LED | 300 x 300 x 35 | 42 kg |
| Agies SEG L LED | AGI4X5-L-LED | 375 x 300 x 35 | 49,4 kg |

SMART FRAME Light Box 100

Back-lit standing panel built from an aluminium frame and high quality graphics printed on fabric.

100 mm frame is easily put together in the corners,

and the fabric finished with a silicone rubber band is inserted into the profile.

LEDs are placed inside on the profile's longer edges.

- silver, black or white aluminium profiles
- internal LED lighting
- one- or double-sided textile graphics
- graphics inserted onto silicone tape
- additional feet or wall and ceiling slings
- reinforcing cross-bars for larger formats

| Model / Index | Dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|-------------------|----------------------------------------------|--------------------------------|
| SFLB100 - 70/100 | 70 x 100 x 10 | 6,9 kg |
| SFLB100 - 100/100 | 100 x 100 x 10 | 8 kg |
| SFLB100 - 100/150 | 100 x 150 x 10 | 10,3 kg |
| SFLB100 - 100/200 | 100 x 200 x 10 | 13,1 kg |
| SFLB100 - 100/250 | 100 x 250 x 10 | 15,5 kg |
| SFLB100 - 150/200 | 150 x 200 x 10 | 15,5 kg |
| SFLB100 - 150/250 | 150 x 250 x 10 | 18 kg |
| SFLB100 - 200/200 | 200 x 200 x 10 | 19,1 kg |
| SFLB100 - 200/250 | 200 x 250 x 10 | 22,1 kg |
| SFLB100 - 300/200 | 300 x 200 x 10 | 25 kg |
| SFLB100 - 300/250 | 300 x 250 x 10 | 27,6 kg |

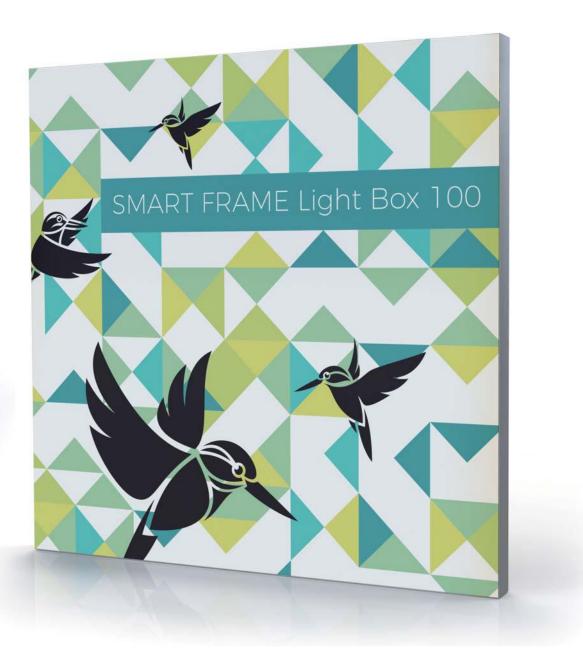

SMART FRAME Light Box 50

Backlit thin panel built from an aluminium frame and high quality graphics printed on fabric.

Ideal as backlit wall images of also a large format. 50 mm frame is easily put together in the corners,

and the fabric finished with a silicone rubber band is inserted into the profile.

LEDs are placed inside on a rear wall made of rigid composite plate.

- silver aluminium profiles, white and black colours as an option
- internal LED lighting
- one-sided textile graphics
- graphics inserted onto silicone tape
- additional wall and ceiling slings

| Model / Index | Dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|------------------|----------------------------------------------|-----------------------------------|
| SFLB50 - 50/70 | 50 x 70 x 5 | 4,9 kg |
| SFLB50 - 70/100 | 70 x 100 x 5 | 7,8 kg |
| SFLB50 - 100/100 | 100 x 100 x 5 | 11,1 kg |
| SFLB50 - 100/150 | 100 x 150 x 5 | 12,8 kg |
| SFLB50 - 100/200 | 100 x 200 x 5 | 16,2 kg |
| SFLB50 - 150/200 | 150 x 200 x 5 | 22,2 kg |
| SFLB50 - 200/200 | 200 x 200 x 5 | 28,1 kg |

SMART FRAME 44

System built from 44 mm aluminium frame and high quality graphics printed on fabric.

Frame is easily put together in the corners, and the fabric finished with a silicone rubber band is inserted into the profile.

An ideal profile for constriction of walls and displays

- silver aluminium profiles, white and black colours as an option
- one- or double-sided textile graphics
- graphics inserted onto silicone tape
- additional feet or wall and ceiling slings
- reinforcing cross-bars for larger formats

| Model / Index | Dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|----------------|----------------------------------------------|--------------------------------|
| SF44 - 70/100 | 70 x 100 x 4,4 | 3,5 kg |
| SF44 - 100/100 | 100 x 100 x 4,4 | 4,1 kg |
| SF44 - 100/150 | 100 x 150 x 4,4 | 5,1 kg |
| SF44 - 100/200 | 100 x 200 x 4,4 | 6,6 kg |
| SF44 - 100/250 | 100 x 250 x 4,4 | 7,6 kg |
| SF44 - 150/200 | 150 x 200 x 4,4 | 8 kg |
| SF44 - 150/250 | 150 x 250 x 4,4 | 9 kg |
| SF44 - 200/200 | 200 x 200 x 4,4 | 10,6 kg |
| SF44 - 200/250 | 200 x 250 x 4,4 | 12 kg |
| SF44 - 300/200 | 300 x 200 x 4,4 | 13,3 kg |
| SF44 - 300/250 | 300 x 250 x 4,4 | 14,8 kg |

SMART FRAME 27

Thicker profile to create graphics mounted on the wall.

Made of 27 mm aluminium profile and high quality graphics printed on fabric inserted into a frame.

Ideal as wall images of a large format.

- silver aluminium profiles, white and black colours as an option
- one-sided textile graphics
- graphics inserted onto silicone tape
- additional wall and ceiling slings or mounted directly to the wall
- suspension from the ceiling possible
- reinforcing cross-bars for larger formats

| Model / Index | Dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|----------------|----------------------------------------------|-----------------------------------|
| SF27 - 50/70 | 50 x 70 x 2,7 | 2,3 kg |
| SF27 - 70/100 | 70 x 100 x 2,7 | 3 kg |
| SF27 - 100/100 | 100 x 100 x 2,7 | 3,5 kg |
| SF27 - 100/150 | 100 x 150 x 2,7 | 4,4 kg |
| SF27 - 150/150 | 150 x 150 x 2,7 | 5,2 kg |
| SF27 - 100/200 | 100 x 200 x 2,7 | 5,8 kg |
| SF27 - 150/200 | 150 x 200 x 2,7 | 7 kg |
| SF27 - 200/200 | 200 x 200 x 2,7 | 9,5 kg |
| SF27 - 300/200 | 300 x 200 x 2,7 | 12 kg |
| | | |

SMART FRAME 19

Thinnest system for creating the wall mounted graphics, built from 19 mm aluminium profile and high quality graphics printed on fabric inserted into a frame.

Ideal as wall images also of a large format.

- silver aluminium profiles, white and black colours as an option
- one-sided textile graphics
- graphics inserted onto silicone tape
- additional wall and ceiling slings or mounted directly to the wall

| Model / Index | Dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|----------------|----------------------------------------------|--------------------------------|
| SF19 - 50/70 | 50 x 70 x 1,9 | 1 kg |
| SF19 - 70/100 | 70 x 100 x 1,9 | 1,5 kg |
| SF19 - 100/100 | 100 x 100 x 1,9 | 1,7 kg |
| SF19 - 100/150 | 100 x 150 x 1,9 | 2,2 kg |
| SF19 - 150/150 | 150 x 150 x 1,9 | 2,7 kg |
| SF19 - 100/200 | 100 x 200 x 1,9 | 2,6 kg |

| SFGO100X200-TB-FT-SET | 100 x 200 | 7,2 kg |

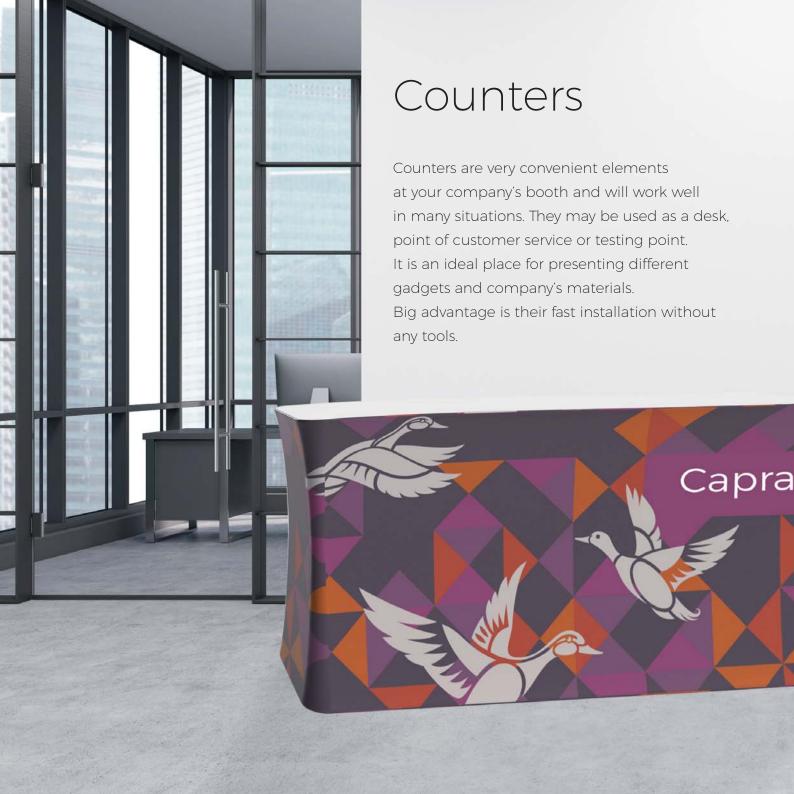

ARIETE

Smart Display is characterized by a graphics printed on elastic fabric stretched onto an aluminium structure. Fabric is affixed to the top by means of silicone rubber. Aluminium structure provides stability while maintaining small weight.

Advantages of Ariete counter

- solid and stable structure
- high quality fabric
- fast and easy installation
- bag included

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|--------|-------|-----------------------------------------------------|-----------------------------------|
| Ariete | ARI | 80 x 100 x40 | 9,7 kg |

CAPRA

Counters in Smooth Display system are characterized by graphics printed on elastic fabric stretched on an aluminium structure. Fabric is affixed to the top by means of silicone rubber. Aluminium structure provides stability while maintaining small weight.

Advantages of Capra counters:

- table top on which you may exhibit many products
- maximum load of 50 kg
- high quality graphics
- table top made of black furniture plate
- elastic fabric
- structure made of 32 mm diameter aluminium pipes
- fast and easy installation
- buying Capra you will get a transport bag as a bonus

| Model | Index | Index Fabric dimension (width) x (height) x (depth) cm | |
|-------|-------|--------------------------------------------------------|---------|
| Capra | CAP | 160 x 100 x 40 | 19,1 kg |

Solid structure will withhold a load of up to 50 kg. It will work well in many situations and its transport is easy. Counters in Smart Display system are characterized by graphics printed on elastic fabric stretched on an aluminium structure. Fabric is affixed to the top by means of silicone rubber. Aluminium structure provides stability.

Advantages of Ovis counter:

- textile graphics on elastic fabric
- elegant table top made of black furniture plate
- maximum load of 50 kg
- stable structure made of 32 mm diameter aluminium pipes
- transport bag included in the kit

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|-------|-------|-----------------------------------------------------|-----------------------------------|
| Ovis | OVI | 60 x 100 x 40 | 8,6 kg |

Ovis

OKAPIA

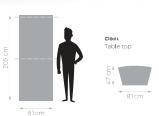

It is an ideal solution for product tasting and exhibition. Made of PVC walls onto which the graphics printed on foil is glued.

Additional top with graphics will allow exhibiting the booth. PVC table top in white colour.

Advantages of Okapia:

- fast and easy installation
- additional top with graphics
- capacious inner locker
- transport bag included in the kit

| Model | Index | Fabric dimension (width) x (height) x (depth) cm | Weight structure with graphics |
|--------|-------|-----------------------------------------------------|--------------------------------|
| Okapia | OKA | 81 x 205 x 47 | 11,6kg |

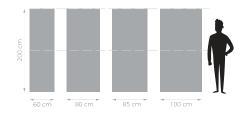

CAIMAN

Roll-ups in cost effective version.

- clip strip with plugs
- lower part of graphics affixed by adhesive tape
- bungee type mast
- two rotating legs
- mast stabilizer
- cost-effective bag with no reinforcements
